

APPENDIX A

SCHEDULE OF FEES:

SEWER REPAIR PERMIT FEE: \$500.00

SEWER DISCONNECTION PERMIT FEE: \$500.00

SEWER EXTENSION PERMIT FEE: \$500.00 Plus \$2.00 per linear foot

SEWER CONNECTION PERMIT FEE: \$500.00 Plus \$7.50 per gallon per day

The Sewer Connection fee shall be calculated using the “System Sewage Flow Design Criteria” as indicated in 310 CMR 15.203. This connection fee is established to remove I/I (Inflow/Infiltration) from the Town’s sanitary sewer system based upon the amount of daily sewage flow contributing to the system from a new connection or from the increased flow in an existing connection due to additional building construction. In cases where an existing building existed on the same lot where a new building is proposed a credit for the existing flow shall be granted in accordance with section 5.4.1. The table of “Sewage Flow Estimates” is included below.

For example, a single family, three bedroom house contributes 110 gallons per day per bedroom to the Town’s sanitary sewer system. Therefore:

$$\begin{aligned} &3 \text{ bedrooms} \times 110 \text{ gallons per day} \times \$7.50 \text{ per gallon per day} = \$2,475 \\ &\$2,475 + \$500 = \$2,975 \text{ (Total Sewer Connection Fee)} \end{aligned}$$

****All permit fees are due at the time of application.****
